**Overview.** AKS-Labs is focused on creating powerful and easy to use solutions for getting valuable information out of files created with popular office tools.

**Developed Solutions.** We have developed document search solution - Files Search Assistant that provides fast and reliable document search that includes preview and search customization functions.

Compare Suite is another award winning tool. It is a document comparison tool that allows handling modifications of any popular office documents and whole projects.

**Common AKS benefits.** Collaboration is easy with AKS tools, as developed products include wide range of reporting means, which enable sharing of critical information with co-workers.

AKS products are used widely. Home based professionals as well as representatives of departments of large companies found our products easy to install, configure and use. It doesn't require much time to integrate our products into your workspace.

**AKS web-site.** AKS is interested in providing our users with cutting edge information. We highlight publications and researches of well-known IT professionals. Our specialists always looking for writing about new solutions, including different applications of our software, job or industry related usage specificity. That's why information represented on our web site is beneficial for our users and site's visitors.

**AKS Support Service.** AKS-Labs operates a 24-hour Customer Service Center. It acts as a single point of entry for all implementation and product-related queries. Our intention is to ensure that your service requests are prioritized and resolved in an efficient and timely manner.
